CAROUSEL INTERACTIVE TOUCH

The Carousel Interactive Touch plug-in gives you the ability to create interactive bulletins in a Carousel zone. These bulletins can be simple web sites, or full-blown Adobe Flash applications. Now you can easily create custom interactive experiences for your viewers!

- :: Carousel Interactive Touch is an optional plug-in for Carousel. One license is needed for each channel that requires interactive touch.
- :: Provide interactivity via an external web site, or a web site uploaded into Carousel. Embed Adobe Flash into your web sites for a one of a kind interactive experience.
- :: The interactive presentation will automatically restart when the viewer leaves the touch panel.
- :: Reach multiple audiences by scheduling different interactive presentations throughout the day.
- :: Override interactive presentations with alert bulletins during emergency situations or special events.
- :: This plug-in requires a touch screen panel, which is available separately.
- :: Interactive websites and applications are not included with this plug-in and must be developed separately.
